Take control of the weather with

SunSpec's Louvre Roof

Our Louvre Roof can be opened by remote to any desired position, but is completely water-tight when closed. Australian outdoor living demands a roof that compliments varying weather conditions. Only SunSpec's Louvre Roof offers you light, shade, shelter or ventilation at the touch of a button.

How It Works

A small motor rotates each louvre blade in unison over 170° with the ability to stop anywhere in the range of motion. This allows a precise regulation of light, shade, shelter & ventilation. When closed, the interlocking louvre blades create a waterproof seal, and a slight pitch drains water away into the internal gutter system. The motor is powered by a small, rechargeable 12-volt battery & controlled by either a switch or remote control. The battery maintains its charge by a 5-watt solar panel incorporated into the system.

Louvre Roof Benefits

- ★ Sunlight, shade & rain-protection on demand by remote control.
- ★ No rust, rot or deterioration.
- ★ Powder coated, marine-grade aluminium.
- ★ Industry-leading 10-year warranty on all parts & labor.
- ★ Powered by 12V lithium battery & small 5W solar panel means no hard wiring into your house.
- ★ No time consuming or expensive maintenance.
- ★ Protects window coverings, flooring & furniture from weather damage.
- ★ Reduces interior cooling costs by shading exterior walls from solar heat.
- ★ Allows rising hot air & high winds to pass through (unlike regular solid roofs).
- ★ Suitable for all types of outdoor areas: attached to existing structures, built free-standing or incorporated into current solid roofs.
- ★ Can be installed flat, pitched and gabled, or even vertically for privacy wall screening & wind protection.
- ★ Applications include: patios, decks, verandahs, spas, swimming pools, gazebos, outdoor kitchens, BBQ areas, courtyards, entryways, carports & anywhere else of benefit.
